

Schedule of Classes

2009 SUMMER

Current as of 6/19/2009

This report provides a listing of classes offered at Utah Valley State College, as of 6/19/2009, for the 2009 SUMMER term. Classes are sorted according to Subject, Location, Session (day, evening, etc.), and department (e.g., Regular, Internet, Honors, North Valley).

This list is subject to change! This class schedule is not a contract between the college and its students. The college reserves the right to change instructors, course offerings, credit hours, scheduled times, and registration requirements as college business may require.

UVLink's registration search will always provide up-to-date information on classes offered. To see a more recent copy of this file, other registration helps/hints, or the student timetable, please check the web at <http://www.uvu.edu/schedule>.

To search for all classes taught at a specific location, a specific time of day, or to register for any of these classes, please login to UVLink from the UVU homepage at <http://www.uvu.edu>. You will also find complete information on any special fees or tuition on UVLink's registration system.

Open/Closed Sections: This listing contains all sections that are active in the registration system. Courses that are closed either require department permission for registration, or the section has met its enrollment limit. Cancelled sections are not included in this list.

Linked Sections: If a class has a link code listed, you must register for a "co-requisite" section. For example, if a section has a link to/from code of "A9 / 09", you must register for two sections to take the class. In this example, the first class must have a "to/from" code of "A9 / 09" and the second class must have a "to/from" code of "09 / A9".

GE Codes: Courses that meet GE requirements have a two-character, alphabetical code at the end of their title. For more information on GE codes, please contact an advisor or the graduation/transfer office.

Section and Meeting Schedule Types: Each class has a schedule type (e.g., lecture, lab, internet) that is used as one way to describe how the course is delivered. If the schedule type for a meeting line is more specific in nature than the section schedule type, it will be printed next to the meeting line information. If the section and meeting schedule types are the same, the meeting line
