Dematic Sprocket
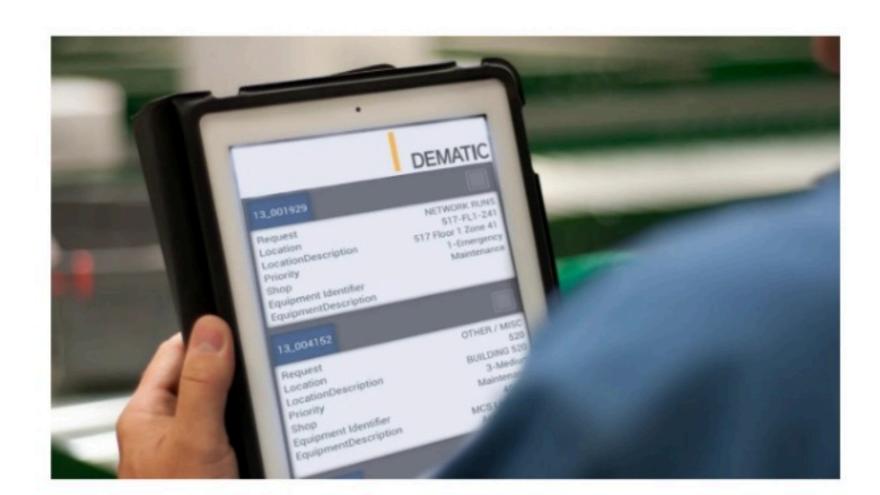

Enterprise Asset Management Software

Dematic Sprocket is cloud-based Enterprise Asset Management (EAM) software that empowers facility managers to organize and maintain the physical assets of their operations.

Dematic Sprocket tracks asset location, condition, maintenance history, and other critical information. It optimizes asset performance to reduce downtime and maximize capital investments. It can schedule maintenance tasks and track work orders to improve operational efficiency, trim costs, and guarantee compliance.

Beyond basic facility maintenance

As an EAM system, Dematic Sprocket surpasses the capabilities of a standard computerized maintenance management system (CMMS). It provides total facility management: inventory control, preventive maintenance, reporting & analytics, capital asset management, and more.

The Dematic Sprocket user interface is simple and intuitive, creating a proactive, productive work environment. The software can integrate seamlessly with other enterprise systems in a facility to increase the productivity and reliability of your operation.

Dematic Sprocket provides the toolset you need for efficient, effective maintenance management.

Committed to Enterprise Asset Management

Dematic Sprocket is not just a software application — it is a complete maintenance solution. The Dematic team recognizes you cannot afford downtime for your assets and operations. Accordingly, we have created a service program that accounts for those needs, from implementation to launch to ongoing support.

The program starts at implementation. A Dematic consultant guides you through data collection and clean-up to validate data integrity. We work with you through site configurations and training throughout the process. After your site is up and running, Dematic is there to provide expert advice and complete service support.

Dematic Sprocket is a trusted EAM system solution with over 500 implementations and 35,000+ daily users. The Dematic commitment to quality customer care ensures on-time and on-budget deployment. Customers have demonstrated their approval with a 98% renewal rate.

Industries Served

Dematic Sprocket can bring immediate and lasting value to most any operation. But there are specific advantages for the following key industries:

Distribution   +

Manufacturing   +

Energy & Solar   +

Turn your maintenance department into a profit center

Dematic Sprocket offers a wide variety of feature modules that maximize the productivity and reliability of your operation.

Work Management

Inventory Control

Asset Management

Preventive Maintenance

Inspections

Reporting & Dashboards

Mobile Maintenance

Meters & Alerts

Fleet Management

Automate your work processes. Free technicians from managing work orders and let them go directly to completing them.

Dematic Sprocket provides a streamlined solution for effectively managing and scheduling maintenance activities and resources. As labor requirements are reduced, productivity and profitability grow throughout your operation.

Effective Facility Maintenance

The Work Management module tracks work orders and allows technicians to navigate parts checkouts and track equipment downtime. Improved data accuracy ensures maintenance efficiency.

- **Flexible Design:** Customize screens and workflows to match your maintenance processes.
- **Optimized Procedures:** Generate and assign work orders automatically based on technician skill sets.
- **Enhanced Project Management:** Combine activities to simplify and streamline managing your assets.

Benefits

- Provides deep visibility into daily work activities
- Accommodates varying workflows by creating unique work order types
- Emphasizes pertinent information to specified user groups with show/hide screens
- Delivers a cost summary of work orders that includes both spare parts and labor time
- Eliminates emails and faxes from facility employees — portal for submitting tickets

What criteria should you use when evaluating an automation partner?

1 Can they scale?

2 Is there a robust software ecosystem?

3 Can you contact support whenever you need?

It is critical to select the right supplier - one that will be a trusted partner throughout the entire process.

As a company that's led innovation in Supply Chain for more than 200 years, Dematic provides the widest range of solutions and the expertise to build the solution you need for complete control and visibility over your operation.

Our solutions are tailored to your business challenges. Using standardized sub-systems and industry-leading insight and expertise, Dematic provides world-class integrated hardware, software, and support to help you empower people, optimize space, drive growth and improve efficiency.

With Dematic, you can grow your business to compete locally, retain customer loyalty, and deliver with speed and accuracy on a global scale.
