Flight Center Services		
<b>Airline Relationships &amp; Bridge Agreements</b>		<b>\$0</b>
<b>TOTAL PROGRAM COST:</b>		<b>\$65,716</b>

\*Flight course fees are based on the average completion times of students in the curriculum. Training times may vary depending on individual student study habits and overall ability. Students are entitled to no more than the flight hours indicated for the course. Any additional training costs after reaching the flight hour limit will be the student’s responsibility. Students who closely follow the direction of their instructor and study consistently are more likely to avoid additional costs. Flight course fees in future semesters may fluctuate with operating costs.
