Chemistry (CHEM)

CHEM 1010  PP  Introduction to Chemistry  3:3:0  Fall, Spring, Summer  
* Prerequisite(s): MAT 1000 or MAT 1010 or MAT 1030 or MAT 1035 or MATH 1050 or MATH 1055 passed with a C- or better, or a placement score equivalent to MATH 1050
* Corequisite(s): CHEM 1015 (optional)

Assumes no previous knowledge of chemistry. Presents the foundations of chemistry to students who need preparation for further study in chemistry as well as to students who only want to take an introductory course. Covers chemical measurements, atomic structure, formulas, chemical reactions and equations, chemical nomenclature, stoichiometry, molecules and chemical bonding, gas laws, liquids, solids, solutions, acids and bases.

CHEM 1015  PP  Introduction to Chemistry Lab  1:0:2  Spring  
* Corequisite(s): CHEM 1010

A lab designed to accompany CHEM 1010. Provides practical experience to support chemistry foundational learning. Emphasizes chemical measurements, atomic structure, formulas, chemical reactions and equations, chemical nomenclature, stoichiometry, molecules and chemical bonding, gas laws, liquids, solids, solutions, acids and bases.

CHEM 1110  PP  Elementary Chemistry for the Health Sciences  4:4:0  Fall, Spring, Summer  
* Prerequisite(s): MAT 1000 or MAT 1010 or MAT 1030 or MAT 1035 or MATH 1050 or MATH 1055 passed with a C- or better, or a placement score equivalent to MATH 1050

Introduces the fundamentals of chemistry to students in the health sciences. Covers chemical measurements and calculations, atomic structure, chemical bonding, chemical reactions, states of matter, solutions, chemical equilibrium, acid-base systems, and introduces organic chemistry.

CHEM 1115  PP  Elementary Chemistry Laboratory  1:0:2  Fall, Spring, Summer  
* Prerequisite(s) or Corequisite(s): CHEM 1010 or CHEM 1110

Introduces inorganic laboratory experiments including density, precipitation, determination of empirical formulas, gas laws and acid-base reactions. Course Lab fee of $20 applies.

CHEM 1120  PP  Elementary Organic Bio-Chemistry  4:4:0  Spring  
* Prerequisite(s): CHEM 1110

Introduces organic and biochemistry for non-chemistry majors entering nursing and other allied health fields such as medical technology, physical therapy, nutrition, and environmental technology. Studies the nomenclature of organic compounds, organic functional groups and their reactivities, stereochemistry, major biomolecules and their metabolism, enzymes, chemical communications, and chemistry of heredity. May also be used to prepare for organic chemistry (CHEM 2310 and 2320).

CHEM 1125  PP  Elementary Organic Bio-Chemistry Laboratory  1:0:3  Spring  
* Prerequisite(s): CHEM 1110 and CHEM 1115
* Corequisite(s): CHEM 1120

An introductory organic bio-chemistry laboratory class for non-chemistry majors who need a laboratory to accompany Elementary Organic Bio-Chemistry (CHEM 1120). Explores identifications and reactions of organic functional groups and conducts experiments with biomolecules. Course Lab fee of $76 applies.

CHEM 1210  PP  Principles of Chemistry I  4:4:0  Fall, Spring, Summer  
* Prerequisite(s): MATH 1050 or MATH 1055 or any higher MATH course with a C- or better, or appropriate placement scores for MATH 1060 or higher.
* Corequisite(s): CHEM 1215

First semester of a full-year course primarily for students in the physical and biological sciences and engineering. Covers fundamentals of chemistry including atoms, molecules, reactions, stoichiometry, chemical bonding, thermochemistry, and gas laws.

CHEM 1215  PP  Principles of Chemistry I Laboratory  1:0:3  Fall, Spring, Summer  
* Corequisite(s): CHEM 1210

Primarily for students in the physical and biological sciences and engineering. Introduces laboratory safety and chemical waste disposal practices. Teaches techniques of using standard laboratory equipment. Shows how to record laboratory data and prepare laboratory reports. Experiments follow topics in CHEM 1210. Course Lab fee of $39 applies.

CHEM 1220  PP  Principles of Chemistry II  4:4:0  Fall, Spring, Summer  
* Prerequisite(s): CHEM 1210 with a grade of C- or higher
* Corequisite(s): CHEM 1225

Continuation of Chemistry 1210. Primarily for students in the physical and biological sciences and engineering. Covers intermolecular interactions, properties of solutions, kinetics, equilibria, thermodynamics, and electrochemistry.

CHEM 1225  PP  Principles of Chemistry II Laboratory  1:0:3  Fall, Spring, Summer  
* Prerequisite(s): CHEM 1215
* Corequisite(s): CHEM 1220

Is designed for the physical and biological sciences and engineering. Teaches intermolecular interactions, properties of solutions, kinetics, equilibria, thermodynamics, and electrochemistry. Follows CHEM 1215 and emphasizes topics from CHEM 1220. Course Lab fee of $39 applies.

CHEM 2310  PP  Organic Chemistry I  4:4:0  Fall, Spring, Summer  
* Prerequisite(s): CHEM 1220 with a grade of C- or higher
* Corequisite(s): CHEM 2315

The first in a series of two organic chemistry classes for students majoring in science and for those interested in careers in medicine, dentistry, veterinary science, and pharmacy, who must complete two semesters of organic chemistry. Teaches bonding and structures of organic molecules. Explores the relationship between structure and reactivity of organic functional groups. Introduces the concepts of nomenclature, stereochemistry, and reaction mechanism.

CHEM 2315  PP  Organic Chemistry I Laboratory  1:0:4  Fall, Spring, Summer  
* Prerequisite(s): CHEM 1220, CHEM 1225
* Corequisite(s): CHEM 2310

The first of a series of two laboratory courses to accompany CHEM 2310 and 2320. For students majoring in science and those interested in careers in medicine, dentistry, veterinary science, and pharmacy. Introduces safety in organic chemistry lab and chemical waste disposal. Teaches basic separatory, purification, and analytical techniques in organic chemistry such as crystallization, melting points, distillation and chromatography. Introduces organic synthesis using simple organic reactions. Introduces natural product isolation. Course Lab fee of $142 applies.
## Chemistry

**CHEM 2320**  
Organic Chemistry II  
4:4:0  
Fall, Spring, Summer  
* Prerequisite(s): CHEM 2310 & CHEM 2315 with a C- or higher  
* Corequisite(s): CHEM 2325

Introduces spectroscopic techniques used in identification of organic compounds. Teaches carbon-carbon bond formation strategies. Introduces the concept of aromaticity. Teaches free radicals and their effects on environment and life. Surveys biologically important organic molecules such as carbohydrates, proteins, lipids, and nucleic acids.

**CHEM 2325**  
Organic Chemistry II Laboratory  
1:0:4  
Fall, Spring, Summer  
* Prerequisite(s): CHEM 2315  
* Corequisite(s): CHEM 2320

The second of a series of two laboratory courses to accompany CHEM 2310 and 2320. For students majoring in science and those interested in careers in medicine, dentistry, veterinary science, and pharmacy. Provides hands-on experience in organic synthesis using a series of single and multistep transformations. Teaches identification of products of reactions using spectroscopic techniques. Explores biologically important organic molecules. Course Lab fee of $169 applies.

**CHEM 3000**  
Analytical Chemistry  
2:2:0  
Fall, Spring  
* Prerequisite(s): CHEM 1220, CHEM 1225 and Advanced University Standing  
* Corequisite(s): CHEM 3005

For Chemistry majors and others interested in the basic principles of chemical measurement. Studies principles of quantitative analysis, stoichiometry, equilibrium theory, and volumetric analysis. Introduces error analysis and instrumental methods, especially electrochemistry, spectrophotometry, chromatography, and mass spectrometry.

**CHEM 3005**  
Analytical Chemistry Laboratory  
2:0:6  
Fall, Spring  
* Prerequisite(s): CHEM 1220, CHEM 1225, and University Advanced Standing  
* Corequisite(s): CHEM 3000

For Chemistry majors and others interested in the basic principles of chemical measurement. Laboratory companion to CHEM 3000. Involves conducting experiments in quantitative and qualitative analysis, including volumetric and gravimetric analysis. Also, students will conduct experiments in introductory instrumental methods, including experiments in spectrophotometry, electrochemistry, and chromatography. Course Lab fee of $240 applies.

**CHEM 3020**  
Environmental Chemistry  
3:3:0  
Fall Odd Year  
* Prerequisite(s): CHEM 1225 and University Advanced Standing  
* Corequisite(s): CHEM 3025

Studies the chemistry of soil, ground water, hazardous waste, and the atmosphere. Explores current environmental concerns and issues.

**CHEM 3025**  
Environmental Chemistry Laboratory  
1:0:3  
On Sufficient Demand  
* Prerequisite(s): CHEM 1225 and University Advanced Standing  
* Corequisite(s): CHEM 3020

Laboratory course which supports CHEM 3020. Environmental Chemistry. Introduces laboratory, sampling, and data analyses techniques used in environmental laboratories. Covers air sampling, and soil and water analysis using a variety of instruments and techniques.

**CHEM 3060**  
Physical Chemistry I  
4:4:0  
Fall  
* Prerequisite(s): PHYS 2220 and University Advanced Standing  
* Corequisite(s): CHEM 3065

Introduces spectroscopic techniques used in environmental laboratories. Explores current environmental concerns and issues. Demonstrates physical chemistry experiments exploring principles and concepts. Provides opportunity to design and execute physical chemistry experiments and interpretation of the observations. Applies physical chemistry to solving physical chemistry problems.

**CHEM 3065**  
Physical Chemistry Laboratory I  
1:0:4  
Fall  
* Prerequisite(s): CHEM 3000 and Advanced University Standing  
* Corequisite(s): CHEM 3060

Introduces spectroscopic techniques used in environmental laboratories. Explores current environmental concerns and issues. Demonstrates physical chemistry experiments exploring principles and concepts introduced in CHEM 3060. Teaches design and execution of physical chemistry experiments and interpretation of the observations, as well as application of physical chemistry to solving physical chemistry problems.

**CHEM 3070**  
Physical Chemistry II  
4:4:0  
Spring  
* Prerequisite(s): CHEM 3060, MATH 2210 and University Advanced Standing  
* Corequisite(s): CHEM 3075

Provides an advanced discussion of quantum mechanics, including solutions to the Schrodinger wave equation. Connects quantum mechanics with observables, including spectroscopy.

**CHEM 3075**  
Physical Chemistry II Lab  
1:0:4  
Spring  
* Prerequisite(s): CHEM 3060, CHEM 3065, and University Advanced Standing  
* Corequisite(s): CHEM 3070

Demonstrates physical chemistry experiments exploring principles and concepts. Provides opportunity to design and execute physical chemistry experiments and interpretation of the observations. Applies physical chemistry to solving physical chemistry problems.
CHEM 3300 (Cross-listed with: BTEC 3300)  
Biomolecular Modeling and Simulations  
4:4:0  
Spring  
* Prerequisite(s): CHEM 3600 or BIOL 3600, and University Advanced Standing  
Introduces students to the field of molecular modeling and simulations and to the wide range of problems that can be tackled using computational methods. Focuses on biomolecular simulations and computer-aided drug discovery. Emphasizes the connection between structure, dynamics, and function. Teaches application of algorithmic thinking to solving complex problems. Develops practical skills needed to perform simulations and analyze the results. Develops understanding of the inherent approximations and limitations of the methods for adequate assessment of modeling results. Covers topics such as molecular visualization and rendering, molecular dynamics simulations, and computer-aided drug discovery through virtual screening and small molecule docking.

CHEM 3600 (Cross-listed with: BIOL 3600)  
Biological Chemistry II  
CHEM 3600  
Spring  
* Prerequisite(s): CHEM 3600 or BIOL 3600, and University Advanced Standing  
Explores metabolic pathways, biosynthesis, enzymatics, thermodynamics, membrane dynamics and related processes within a living cell. Emphasizes molecular mechanisms of reactions and their outcome.

CHEM 3605 (Cross-listed with: BIOL 3605)  
Biochemistry Laboratory  
1:0:4  
Fall, Spring  
* Prerequisite(s): University Advanced Standing  
* Corequisite(s): BIOL 3600  
Introduces laboratory techniques in biochemistry. Studies methods and theory behind purification of proteins and nucleic acids including chromatography and electrophoresis. Uses methods in assessing enzyme activity and kinetics and protein structure analysis. Includes analysis and manipulation of DNA and RNA. Course Lab fee of $151 applies.

CHEM 3620 (Cross-listed with: BIOL 3620)  
Biological Chemistry II  
3:3:0  
Spring  
* Prerequisite(s): CHEM 3600 or BIOL 3600 and University Advanced Standing  
Is a continuation of CHEM 3600. Teaches in-depth the biochemistry of molecular and cell biology processes. Explores the topics of molecular information flow and signaling. Examines current understanding in biochemical methods and ideas beyond those discussed in Biochem I.

CHEM 3800 (Cross-listed with: ENVT 3800, PHYS 3800)  
Energy Use on Earth  
3:3:0  
Fall  
* Prerequisite(s): (PHYS 1010 or PHSC 1000 or CHEM 1010 or GEO 1010 or GEO 2040 or METO 1010) and (MATH 1050 or MATH 1055) and University Advanced Standing  
Covers the science of energy production and consumption. Quantitatively analyzes various methods of energy production, distribution, and end use in all sectors of our society, including transportation, residential living, and industry. Examines the impacts of our energy consumption on the environment and prospects for alternative energy sources. Intended for science majors interested in energy use in society or in an energy related career, and for students in other majors who feel that a technical understanding of energy use will help them to understand and mitigate its impact in our society.

CHEM 4000 (Cross-listed with: BTEC 4000)  
Instrumental Analysis Laboratory  
2:0:6  
Spring  
* Prerequisite(s): CHEM 3000, and University Advanced Standing  
* Corequisite(s): CHEM 4005  
Covers modern instrumental methods and basic principles of instrumentation. Includes spectroscopic and chromatographic analysis.

CHEM 4005  
Instrumental Analysis Laboratory  
2:0:6  
Spring  
* Prerequisite(s): CHEM 3000, CHEM 2325, and University Advanced Standing  
* Corequisite(s): CHEM 4000  
Experiments in selected areas of instrumental methods of analysis. Covers both quantitative and qualitative methods of analysis. Includes introductory laboratory exercises and laboratories using advanced sample preparation and instrumental analysis techniques. Involves the independent creation and implementation of an advanced laboratory exercise. Course Lab fee of $247 applies.

CHEM 4030 (Cross-listed with: BIOL 4030)  
Organic Chemistry Laboratory  
3:3:0  
Fall  
* Prerequisite(s): CHEM 1220, MATH 1210, and University Advanced Standing  
Introduces nuclear and radiochemistry, covering primary chemistry literature, and manipulation of state-of-the-art instrumentation. Enables hands-on use and manipulation of state-of-the-art instrumentation. Exposes students to integrated topics in organic, inorganic, physical, solid-state, and biochemistry using advanced theory. Enables hands-on use and manipulation of state-of-the-art instrumentation. Immerses students in the primary chemistry literature, and involves substantial problem solving using spectroscopic and spectrometric data.

CHEM 4200 (Cross-listed with: BIOL 4200, GEO 4200, PHYS 4200)  
Teaching Methods in Science  
3:2:2  
Spring  
* Prerequisite(s): Acceptance into secondary education program, senior-level standing, instructor approval, and University Advanced Standing  
Examines objectives, instructional methods and curriculum for teaching science in the secondary school. Includes developing, adapting, evaluating, and using strategies and materials for teaching biological and physical sciences, appropriate both to the special needs of the learners and the special characteristics of science discipline.

CHEM 4600  
Structure Determination  
3:3:0  
Fall  
* Prerequisite(s): CHEM 2320, and University Advanced Standing  
* Corequisite(s): CHEM 4605  
* Prerequisite(s) or Corequisite(s): CHEM 3600  
Explores integrated topics in organic, inorganic, physical, solid-state, and biochemistry using advanced theory. Enables hands-on use and manipulation of state-of-the-art instrumentation. Examines primary chemistry literature, and involves substantial problem solving using spectroscopic and spectrometric data.

CHEM 4605  
Structure Determination Laboratory  
1:0:4  
Fall  
* Prerequisite(s): CHEM 2320 and University Advanced Standing  
* Corequisite(s): CHEM 4600  
Explores integrated topics in organic, inorganic, physical, solid-state, and biochemistry using advanced theory. Enables hands-on use and manipulation of state-of-the-art instrumentation. Immerses students in the primary chemistry literature, and involves substantial problem solving using spectroscopic and spectrometric data. Taken as a corequisite with CHEM 4600.

CHEM 4800  
Pharmacology  
3:3:0  
Fall  
* Prerequisite(s): (CHEM 3600 or BIOL 3600) and University Advanced Standing  
Examines the science behind pharmacological therapeutics. Examines general considerations such as pharmacokinetics, drug metabolism, and toxicology. Surveys focused topics including drugs and drug targets for a wide variety of diseases.

Utah Valley University  
Course Catalog 2019-2020  
3
CHEM 482R
Chemistry Internship
1 to 4:1 to 4:0 Fall, Spring, Summer
* Prerequisite(s): CHEM 2320, a minimum GPA of 3.0, Departmental approval of the internship proposal, and University Advanced Standing

Provides supervised, practical, and research experience for students preparing for careers in chemistry. May be repeated for a maximum of 6 credit hours as per school standards. May be graded credit/no credit.

CHEM 489R
Undergraduate Research in Chemistry
1 to 4:0:3 to 9 Fall, Spring, Summer
* Prerequisite(s): Departmental approval and University Advanced Standing

Conducts research on a project determined by the student jointly with a chemistry faculty and approved by the Chemistry Department Chair. Emphasizes experimental technique, data collection and analysis, and preparation of research for presentation to an audience of peers. May be repeated for a maximum of 6 credits toward graduation.

CHEM 491R
Advanced Topics in Inorganic Chemistry
3:3:0 On Sufficient Demand
* Prerequisite(s): CHEM 1220, instructor's permission, and University Advanced Standing; CHEM 3100 or CHEM 3600 or BIOL 3600 recommended

Examines advanced and current topics of inorganic chemistry including bioinorganic chemistry, symmetry and molecular orbital theory, and the descriptive chemistry of main-group compounds. Varies from semester to semester. Offered on demand. May be repeated for a maximum of 9 credits.

CHEM 4920
Chemistry Capstone- Literature/Seminar
1:1:0 Fall
* Prerequisite(s): CHEM 2320 with a C- or higher and University Advanced Standing; ENGL 2010 highly recommended

Engages in current chemistry topics. Enables familiarity with chemistry literature resources, teaches chemistry research and design, and facilitates preparation for further education and employment in chemistry-related fields. Focuses on current topics in chemistry and on chemistry literature.

CHEM 4930
Chemistry Capstone- Ethics/Seminar
1:1:0 Spring
* Prerequisite(s): CHEM 2320 with a C- or higher and University Advanced Standing

Teaches chemistry research and design for further education and employment in chemistry-related fields. Focuses on scientific ethics, current topics in chemistry, chemistry literature and formal report writing based on American Chemical Society guidelines.

CHEM 495R
Advanced Topics in Organic Chemistry
3:3:0 On Sufficient Demand
* Prerequisite(s): CHEM 2310, CHEM 2320, Instructor approval, and University Advanced Standing

For students majoring in Chemistry. Varies from semester to semester. May be repeated for a maximum of 9 credits. Topics include organic synthesis, reaction mechanisms, and identification of organic compounds.

CHEM 496R
Special Topics in Chemistry
1 to 4:1 to 4:0 to 9 On Sufficient Demand
* Prerequisite(s): CHEM 2320, Junior or Senior standing, instructor approval, and University Advanced Standing

Explores special topics in chemistry. Topics vary depending on student demand and current topics of significance in chemistry. May be repeated for a maximum of 8 credits toward graduation.

CHEM 499R
Independent Study and Research
1 to 4:0:3 to 12 Fall, Spring, Summer
* Prerequisite(s): Instructor approval and University Advanced Standing

Uses independent study on selected topics and conducting experiments in the same topic. Provides guidance by a faculty member. May be taken for a maximum of 4 credits.

CHEM 525R
Advanced Topics for Chemistry Teachers
1 to 5:1 to 5:0 to 10 Summer
* Prerequisite(s): Departmental Approval

For licensed teachers or teachers seeking to recently their chemistry endorsement from the Utah State Office of Education. Teaches principles of chemistry and pedagogy of teaching chemistry for teachers in public or private schools. Emphasizes correlation with the Utah Core Curriculum, the National Science Education Standards, and the Benchmarks of Project 2061. Topics will vary.
