Utah Valley University's Principles and Governing Structure

Guiding Principles

This plan outlines Utah Valley University's guiding principles for reopening its campuses for the 2020-2021 academic year. Our plan is driven by a commitment to fulfilling our institutional mission by meeting the educational, service, and cultural needs of our service region. In so doing, UVU remains committed to the safety and welfare of our many constituents and developed this plan to address the unique public health challenges facing our university community due to COVID-19. As we reopen our campus to students for fall 2020, our plan is guided by the following priorities:

- To provide guidance to the campus community as we resume normal on-campus operations.
- To bring employees and students back to a safe, healthy working and learning environment.
- To apply best practices to help protect students, faculty, staff, and our greater community from potential exposure to the COVID-19 virus.
- To address areas of high risk for viral transmission and outline requirements and recommendations to limit the potential risks.
- To provide a plan for protecting the university community through effective testing, contact tracing, and containment.
- To monitor local and state health department recommendations (track health indicators), to interact with city, county, and state agencies as needed and applicable.
- To acknowledge the dynamic nature of the pandemic and be alert to updates and making changes to this document as needed.

Working Groups (Organizational Governing Structure)

Point of Contact:

Overall Point of Contact: Robin Ebmeyer, Director of Emergency Management and Safety

- Robin.Ebmeyer@uvu.edu | 801-863-7977

Working Groups Points of Contact:

Academic Continuity: Kathren (Kat) Brown, Associate Provost of Academic Administration

- KBrown@uvu.edu | 801-863-8517

Athletics: Andrew Nelson, Head Trainer

- Andrew.Nelson@uvu.edu | 801-863-8636

Communications: Barb Smith, Director

- Barbara.Smith@uvu.edu | 801-863-5274

Digital Transformation/Information Technology: Brett McKeachnie, Interim Associate Vice President

- MCKEACBR@uvu.edu | 801-863-8940

Facilities: Frank Young, Associate Vice President of Facilities Planning

- Frank.Young@uvu.edu | 801-863-7202

Faculty Senate: Anne Arendt, Faculty Senate President / Department Chair of Technology Management

- Anne.Arendt@uvu.edu | 801-863-5418

Food Services: Ibrahim Tashman, Director of Dining Services

- Ibrahim.Tashman@uvu.edu | 801-863-5594

Health and Safety: Robin Ebmeyer, Director of Emergency Management and Safety

- Robin.Ebmeyer@uvu.edu | 801-863-7977

Human Resources: Alan Drage, Senior Director Human Resources Business Partner

- Alan.Drage@uvu.edu | 801-863-5360

Medical/Health: William (Bill) Erb, Senior Director of Student Health Services

- ERBBI@uvu.edu | 801-863-8972

Office of Engaged Learning: Baldomero Lago, Chief International Officer

- LAGOBA@uvu.edu | 801-863-7301

PACE: Beka Grulich, PACE President / Director of Wasatch Area

- Beka.Grulich@uvu.edu | 801-863-8835

Public Safety: Matthew Pedersen, Director of Public Safety and Chief of Police

- MPedersen@uvu.edu | 801-863-8320

Student Life: Alexis Palmer, Associate Vice President of Student Life/Dean of Students and
Ashley Larsen, Associate Dean of Students

- PALMERAL@uvu.edu | 801-863-8681
- ALarsen@uvu.edu | 801-863-8665

Testing/Contact Tracing: Sue Jackson (current), Professor of Public and Community Health

- Sue.Jackson@uvu.edu | 801-863-8687

Travel/Procurement: John Richards, Director of Purchasing and Travel

- John.Richards@uvu.edu | 801-863-8969

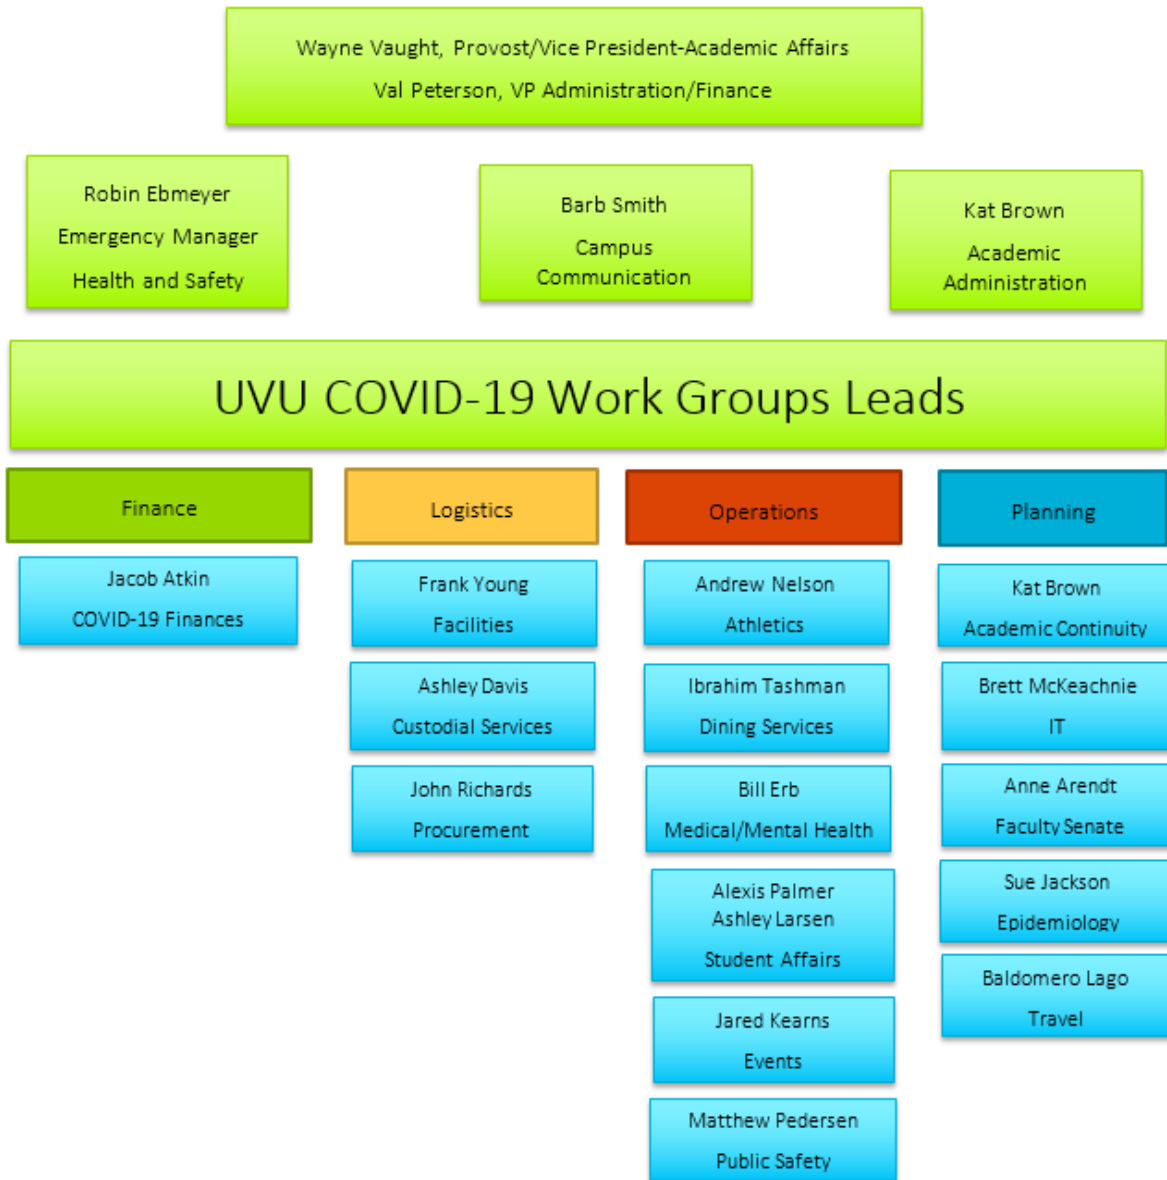

UCCU Center: Jared Kearns, Director of the Events Center

- KEARNSJA@uvu.edu | 801-863-8545

Elements of the Plan

Repopulating Campus

Emergency Planning Section:
Organizational Chart

Emergency/Urgent Communications:

Methods of communication to the campus during the COVID-19 pandemic. Depending on the urgency and message will depend upon what method will be used to get relevant information to the campus community.

- Emergent/Life Threatening: Mass Text Messaging
- Urgent/Timely: Email (NeedToKnow), uvu.info, other websites
- Regular: Email (NeedToKnow), uvu.info, other websites

Resources:

Where to find updated information

Preparation Phase

To ensure that Utah Valley University (UVU) is fully prepared to judiciously repopulate its campus, UVU leadership will consult with state and local public health experts to confirm that it is safe to resume and continue campus operations. The potential for a virus to spread by repopulating campus is not limited to the students themselves — it extends to faculty, staff, and the surrounding community. State and local health authorities will define and articulate the metrics of prevalence to guide institutions in implementing needed mitigation. In addition, to promote campus safety:

1. The UVU cabinet meets regularly to identify COVID related challenges for the academic year.
2. The UVU COVID-19 working group meets weekly to identify issues and concerns.
3. Facilities has modified classroom and common spaces to promote social distancing.
4. Facilities continues to monitor and order necessary supplies (disinfectants, hand sanitizer, shields, etc.).
5. Academic, student, and staff leadership developed health and safety plans specific to their individual units.
6. UVU will develop and update multiple communications strategies via email, web, and social media outlets.
7. UVU established a COVID-19 implementation committee to meet weekly in order to implement the strategies outlined in this document.
8. UVU will create and streamline ordering of common supplies that departments/areas may need. This will decrease competition with each other and ensure procurement regulations are followed.

Return to Campus (Students, Faculty, and Staff)

In order to orient students, faculty, and staff to new on-campus safety protocols, UVU will do the following:

Establish effective communication strategies for the campus community through:

- a. Creation of informational websites:
 - o uvu.edu/fall2020: Details from Academic Affairs
 - o uvu.edu/returntocampus/: Health and safety information for repopulating the physical campus
- b. Email and social media strategies
- c. Encourage supervisors to have one-on-one conversations regarding their return to campus.
- d. Signage. Marketing and Communications will develop signs approved with correct branding to decrease the number of signs made by each department. Signs (e.g., high-traffic entrances into

main campus, signs for hygiene in the bathroom, face coverings in classrooms, distancing indicators, elevator reminders, etc.) are available through Marketing and Communications.

Implement environmental control measures:

- Reduced seating capacities in classrooms and public spaces to promote social distancing.
- Requiring facial covering. We have provided or will provide one mask for every employee and student. Face coverings (e.g., mask, scarf, gaiter, and bandana) are required to be worn in public settings where other social distancing measures are difficult to maintain.
- Reduced face-to-face instruction (to approximately 40%) using online and livestream.
- Provided livestream options for all face-to-face courses, allowing students who have tested positive, are symptomatic, or are otherwise at risk to continue in the course while remaining off campus.
- Increase hand sanitization stations across campus (high-traffic areas).
- Continue to use and maintain filters in the heating, ventilation, and air conditioning (HVAC) system, increase the airflow, and, where possible, over-pressurize the buildings.
- Provide protective barriers (plastic barriers) in high-traffic, public-facing areas (locations where two people must come into closer contact with each other to complete the service). Note: a plastic barrier is not a replacement for using a face covering.
- Intensify the regular cleaning and disinfecting of facilities (Custodial Services). Please note that departments/areas should implement additional cleaning for high-touch areas in their locations. Due to the focus on cleaning high-traffic areas, Custodial Services will decrease in other areas such as personal office spaces.
- If an employee or student is suspected or confirmed to have COVID-19 and it has been less than 14 days since they were in an on-campus area for an extended length of time, the area will be closed. Those areas accessed by the person confirmed with COVID-19 will be cleaned and disinfected before reopened.
- UVU reserves the right to select areas that may be subject to a health screening. Examples of possible areas include Culinary Arts, the Wee Care Center, the Student Life and Wellness Center, food services, and others.
- Work with units to develop control measure plans specific to the needs and challenges of their units.

Maintain general measures:

- Place signage (digital, flyers, posters) that encourage protective precautions to help stop the spread throughout the workplace (e.g., classrooms, high-traffic entrances, bathrooms, food service areas, the library, etc.).
- Provide education, regular communication, and training to faculty, staff, administrators, and students.
- Minimize non-essential travel; any approved UVU travel is subject to national, state, and local regulations and guidance.

Support Human Resources' employee health and wellness measures:

- Employees who are not feeling well must not come to work. Employees are to notify their supervisors of their absence due to illness.
- If a supervisor observes an employee with symptoms, the supervisor will send the employee home.
- UVU provides full-time employees paid sick leave and sick leave accrual, as well as job and benefit protections under Family and Medical Leave Act (FLMA) in qualified circumstances. In addition, the federal government has enacted the Families First Coronavirus Response Act (FFCRA) that provides full- and part-time employees with emergency paid sick leave (EPSL).
- Employees being tested for COVID-19 are encouraged to complete the Employee COVID-19 Reporting Form found on [the coronavirus website](#) under "Additional Resources."
- Employees who have been asked to quarantine by the health department or a healthcare provider must stay home for 14 days as directed. Employees are expected to notify their supervisor of their health status and the possibility of working from home during this time.
- Employees who are ill with symptoms consistent with COVID-19 are to self-isolate at home. This includes an employee who tested positive, negative, or did not test at all for the coronavirus.
- The employee cannot return to work until they are without a fever (taking no fever-reducing medication) AND have improved symptoms for at least 72 hours. Time away must equal at least 10 days per Centers for Disease Control and Prevention (CDC) recommendations.
- Employees who have been working remotely and became ill at any time 14 days prior to their return to campus must complete the [Recent Illness Release Form](#) found under "Reporting COVID-19 and Protecting Yourself and Others" BEFORE returning to work on campus.
- Employees who live with or are caring for someone who is ill should contact HR to review leave options.
- Employees who are facing challenges balancing work due to dependents' school or daycare facilities closure from COVID-19 can contact Human Resources (HR) for leave options.

Encourage individual protective measures:

- Personal responsibility: Not every unique, individual situation can be anticipated. UVU students, staff, and faculty must take personal responsibility to be informed and take actions based on their common sense and wise judgment that will protect health and support the safe operation of the university's programs, services, and facilities.
- Self-monitoring: If you experience symptoms consistent with COVID-19 or are otherwise ill, please notify your supervisor of your absence due to illness.
- Self-isolation: If you have been asked to self-isolate or self-quarantine, please notify your supervisor. If possible, you may be able to perform your work remotely during this time.
- Protective hygiene and cleaning: Each individual must exercise personal protective practices (hygiene and cleaning regimens) to minimize the spread of the virus, including:
 - Washing your hands with soap and water for at least 20 seconds:
 - i. Before and after work shifts
 - ii. Before and after work breaks
 - iii. After blowing your nose, coughing, or sneezing
 - iv. After using the restroom
 - v. Before eating or preparing food
 - vi. After putting on, touching, or removing cloth face coverings
 - Using hand sanitizer (at least 60% alcohol) after interactions with people and objects, when hand washing is unavailable.
 - Covering your mouth and nose with a tissue (or use the inside of the elbow) when coughing or sneezing (throw used tissues into trash cans, and immediately wash your hands with soap and water for at least 20 seconds).
 - Frequently cleaning high-touch surfaces (e.g., buttons, door handles, counters, keyboards, telephones, desks, handrails, work tools, etc.). Do not solely depend on custodial for cleaning — this responsibility belongs to everyone.
 - Avoiding the use of other employees' phones, desks, offices, or other work tools and equipment when possible. Clean and disinfect any shared tools or equipment before and after use.
 - Refraining from shaking hands and encouraging the use of other non-contact methods of greeting.
 - Wearing a face covering (cloth or other non-medical) in public areas to protect co-workers, students, and others is required. Wearing a face covering is also required in classrooms. For those unable to wear masks for documented medical purposes, alternative arrangements will be made on a case-by-case basis. If working alone in an office or other area where spacing may be maintained, a face covering may be removed.
 - Maintaining social distancing standards in all situations.

- In interacting:
 - i. Limit group sizes in accordance with current state guidance.
 - ii. Limit face-to-face interactions by communicating and conducting business via email, phone, Microsoft Teams, or other technology.
- Guidance: Follow public health guidance (the Utah Department of Health and Utah County Department of Health) to ensure campus is not required to return to more restrictive operations.

Address high-risk populations:

If any employee believes they are high risk based on [Utah Department of Health](#) or [CDC guidelines](#), they are encouraged to contact Human Resources. An employee may need to provide personal health information to Human Resources, but Human Resources does not share personal health information with others, including supervisors – this way employee privacy is maintained. Human Resources will work with employees and supervisors to implement a work plan.

We will not always know if a coworker is “high risk” (private information), but if we consider all coworkers as potentially “high risk,” we will demonstrate exceptional care for all by vigilantly following the health guidelines of wearing a mask, maintaining a social distance of at least six feet, washing your hands frequently, covering coughs/sneezes, and not coming to campus when you are ill.

Implementation of State Guidelines in Institutional Settings

UVU will adopt the State of Utah’s public health guidelines, including wearing face coverings, physical distancing, and density restrictions for common areas, dining facilities, and classrooms. UVU will develop practices and procedures in alignment with Utah’s Phased Health Guidelines for varying institutional functions on campus. These may be found in Appendix A: Phased Guidelines.

Monitoring for Incidences

Preparation Phase

To ensure that UVU is prepared to safely monitor for incidences on its campus, UVU leadership will work with the State of Utah to prioritize outbreak testing to our campus. Aggressive outbreak testing is critical to successfully implement necessary quarantining, contact tracing, and other subsequent steps in containing an outbreak.

UVU will also work with the state to ensure we have the adequate resources and capacity for contact tracing. UVU has designated an emergency management specialist, reporting to the director of emergency management and safety, as the institution testing and contact tracing coordinator. That person will be responsible for coordinating with the state and local health departments for outbreak testing services; sharing updates and developments on campus and coordinating with other institutions; developing a contact tracing task force; communicating contact tracing protocols and plans with students and faculty on campus; and making sure contact tracing efforts balance privacy and public health.

Testing: UVU does not collect samples nor does it have a laboratory where sample can be tested and obtain results. UVU will reach out to local healthcare systems in order to coordinate testing in the event of an outbreak. UVU will explore potential agreements with certified labs (through healthcare systems) that may be able to assist with testing of those who are not symptomatic, such as athletes (NCAA recommends frequent testing).

Athletics: UVU will work with Intermountain Healthcare for testing required for athletes from the NCAA and the WAC.

To fully prepare to monitor incidences on campus, UVU will do the following:

- Refer symptom-positive students who contact Student Health Services (SHS) to local providers. Due to the location of SHS — in the heart of the UVU Orem Campus — it is not recommended to have symptomatic students coming to campus for COVID-related services.
- Work to develop relationships with local healthcare systems to secure testing options (to prepare for a possible on-campus outbreak).

Contact Tracing

To fully prepare to monitor incidences on campus, UVU will do the following for contact tracing:

- Work with Utah Board of Higher Education (UBHE) to coordinate on-campus contract tracing efforts, support state and local health department contact tracing where appropriate, and comply with state, local, and university health regulations.
 - Implement technology strategies for capturing attendance in classrooms and labs that will assist with contact tracing.
- UVU has created a Prevention/Response Team who will contact trace the campus community within the boundaries of the university. Meaning contact tracing will not go beyond coordinating quarantine and isolation with those who may have exposed on campus.
- UVU has a written protocol for contact tracing and will keep limited records that are HIPAA compliant. These records will be shared as possible with the local health department.
- Coordinate with potential cases and cases testing positive.
- During contact-tracing conversations with student cases and identified contacts who are in self-quarantine, they will be referred to campus services, such as mental health, food, and financial resources, as needed, coordinated with the Dean of Students' office and the CARE team.
- UVU faculty, staff, and students will be encouraged to use the Healthy Together mobile app, to assist with a daily health assessment,
- To supplement contact-tracing efforts of the university other applications will be explored and used as possible (Canvas, Qualtrics) to assist with identification of those who may have been exposed.

Containing Potential Outbreaks

Preparation Phase

To ensure UVU is prepared to contain a potential outbreak on its campus, UVU leadership will obtain adequate supplies of personal protective equipment (PPE), face coverings, and other supplies that will be available for use. UVU will work with and be in contact with local healthcare systems and health department to handle a potential campus outbreak.

Quarantine/Isolation

To fully prepare to contain potential outbreaks on campus, UVU will implement the following protocols for quarantine:

- Employees will be asked to do a self-assessment daily to determine if they are healthy enough to come to campus. UVU reserves the right to conduct a health screening in certain areas, departments, classrooms, and labs.
 - Cases with symptoms will be asked to isolate for at least 10 days from initial symptoms AND have gone 72 hours without a fever (not using any fever-reducing medication), AND 72 hours of improving respiratory symptoms (not using any cold-type medication).
 - Anyone who has met the definition of a “close contacts” (spent greater than 15 minutes within 6 feet of a person who has tested positive for COVID-19, with or without a mask) will be asked to quarantine for 14 days following the last known close contact (contact begins 2 days prior to symptoms) with the case.
 - Anyone who lives with an identified positive case should be quarantined from this person. Meaning they do not have contact during that time period. After 14 days of quarantine and no symptoms they would be able to return to campus.
 - Anyone who tests positive but has no symptoms will be quarantined for 10 days starting with the date of testing.
 - Anyone who lives with someone who has tested positive AND there has been a close contact, will be quarantined for 10 days starting from the test date of the positive case.
- Students in isolation or quarantine will be encouraged, if they are well enough, to continue their coursework through access to live capture classroom video and online assignments.
- Faculty and staff in isolation or quarantine who are well enough to work will do so remotely, coordinating their efforts with their supervisors.

Temporary Modification (if Necessary)

Transition Management Preparation

UVU will be flexible and plan for contingencies where teaching and learning continue to take place via remote or hybrid delivery of instruction — and include scenarios for full or partial physical reopening.

To fully prepare to manage a modification of operations on campus, UVU will do the following:

- Cabinet leadership, with guidance from the UVU emergency management and safety director and others as needed, will assess and determine if a temporary modification of operation.
- If a temporary modification of operation is needed, communication will be sent out to students, faculty, and staff alerting them of the status through multiple UVU communication methods, such as email, online, and text.

- Face-to-face instruction may shift to online, livestream, or hybrid options as deemed necessary to protect the health and safety of the UVU community while continuing to provide essential services.
- All positions on campus will be evaluated by supervisors and reported to Human Resources.
- As a guideline, employees will be categorized as follows:
 - Category 1: Essential and must be on campus if a partial reclosure is needed, with a smaller group identified if a full reclosure is needed.
 - Category 2: Job duties can be performed at home and the employee can work from home. These employees will continue their job duties at home if there is a full or partial reclosure.
 - Category 3: Job duties cannot be performed at home. These employees will be asked not to come to campus until it is reopened.
- Return to Work: During yellow level, employees will return in a slow, phased pattern.
 - Category 1 employees: Presently on campus, no changes.
 - Category 2 employees: Return to work on campus in stages and relating to state guidance as outlined below:
 - Employee groups determined and prioritized by the provost and vice presidents, and the color-coded level and return dates are provided. For example:
 - Group A: Yellow level announced: On the first Monday after three weeks of the state’s announcement, employees return. The state announces yellow level on May 16; employees return on June 8 (Monday) (Y+21).
 - Group B: Yellow level announced: On the first Monday after five weeks of the state’s announcement, employees return. The state announces yellow level on May 16; employees return on June 22 (Monday) (Y+37).
 - Group C: Yellow level announced: On the first Monday after 11 weeks of the state’s announcement, employees return. The state announces yellow level on May 16; employees return on August 3 (Monday) (Y+79).
 - Group D, High Risk: Work with supervisors regarding continued remote working or other options as possible.
 - Category 3 employees: Dependent upon whether their job is available and campus need.
 - Note: In the event of a resurgence of COVID-19 in the community, the state may return to a previous higher alert color level. In that event, UVU would also expect to return to a previous color level.

Conclusion

The overarching objective of this plan is to outline strategies to address the challenges related to COVID-19 and to promote a safe learning environment while continuing to meet the educational needs of our

region. In collaboration with state and local agencies, UVU developed a coordinated plan that includes guidelines and procedures addressing the safety challenges we face in the 2020-2021 academic year. The plan is directly linked to “Utah Leads Together” and CDC guidelines, and the plan corresponds to varying levels of risk as determined by state health authorities. Working with academic, student, and staff leadership from around campus, the plan provides strategies designed to minimize the risk to faculty, students, and staff. The plan covers a wide range of areas from classroom to public spaces to student services and events. The plan also promotes key public health strategies including social distancing, surface cleaning, personal hygiene, and facial coverings. Our plan outlines our communication strategy to disseminate critical information to the UVU community as they begin to return to campus for the fall 2020 semester.

In addition to safety measures, UVU continues to work with state and local leaders to develop an effective strategy for testing, contact tracing, and isolation of individuals who test positive or become symptomatic. At the time this report was due, consensus on a statewide program had not been reached. Our local county health department (Utah County) has also not been able to agree to a specific action plan. Additional work needs to be done in this area.
