Teaching Excellence Model

Definition of Teaching Excellence:

Excellent teaching is inclusive and engaging and empowers students to achieve their educational, personal, and professional goals.

INCLUDE
Inclusive teaching values every student and provides accessible, equitable, and culturally diverse learning experiences and resources for students of all backgrounds. Inclusive teaching fosters an inviting and supportive environment in which students can succeed.

For example, UVU faculty may demonstrate through...

- Curate course materials that represent global diversity, the diversity of the field, and the contested and evolving status of knowledge. [11] [13] [22]
- Design courses and select course resources with physical and content accessibility in mind, including through the integration of Universal Design for Learning principles. [20] [18]
- Develop and demonstrate intercultural competence in instruction and communication. [10] [13]
- Maximize student motivation by leveraging students’ sense of the relevance, rigor, and supportiveness of a course—and of their own self efficacy within it. [17] [25]
- Increase the expression of diverse perspectives in class and through online fora, with collegiality and mutual respect, to advance students’ understanding. [6] [16] [24]

ENGAGE
Engaged teaching provides meaningful, interactive, and experiential learning opportunities that integrate into the fabric of the community. Engaged teachers participate in ongoing dialogue about teaching and learning, professional development, innovation, and reflection about their work.

For example, UVU faculty may demonstrate through...

- Facilitate group work, collaborative learning, problem-based learning, or team-based learning. [8] [21] [26]
- Implement appropriate technologies to facilitate learner outcomes. [19]
- Communicate regularly and promptly with students to address concerns and questions. [2] [23]
- Demonstrate course content/activities that are authentic to future career opportunities. [16] [27]
- Reflect on their teaching practice and make changes over time that are informed by experimentation, professional teaching development, collegial interactions and class observations, student feedback (e.g. SRI), SCOTs observations, and the scholarship of teaching and learning. [4] [5]

ACHIEVE
Achievement-focused teaching empowers students to gain essential knowledge, skills, and competencies needed to face the challenges of a dynamic and complex world. Instructors promote deep learning by integrating disciplinary currency/mastery with metacognitive pedagogy and design of instruction to guide students in realizing outcomes that include learning soft-, hard-, process-, and career-specific skills.

For example, UVU faculty may demonstrate through...

- Create assignments to practice application of course concepts in discipline-relevant situations. [17] [28]
- Provide low-stakes formative assessments with feedback in preparation for high-stakes summative assessments. [2] [3] [28]
- Lead with questions and model expert thought by “thinking aloud” when encountering problems. [14]
- Clearly communicate compelling goals for student learning and design courses tightly aligned with those goals (backward design). [28]
- Clearly convey the purpose, process for completion, and criteria for evaluation of class assignments before students begin work (transparency). [29]
