

Connecting to DCVPN with Cisco AnyConnect

Mac Client

1. Log into the Campus VPN web page.

Log into the Campus VPN web page with your UVID and password at <https://dcvpn.uvu.edu>

Login

Please enter your username and password.

USERNAME: 10565656

PASSWORD:

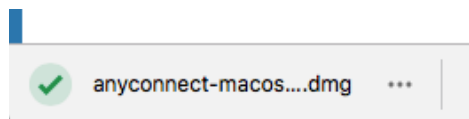

Login

2. Download the Cisco AnyConnect VPN Client.

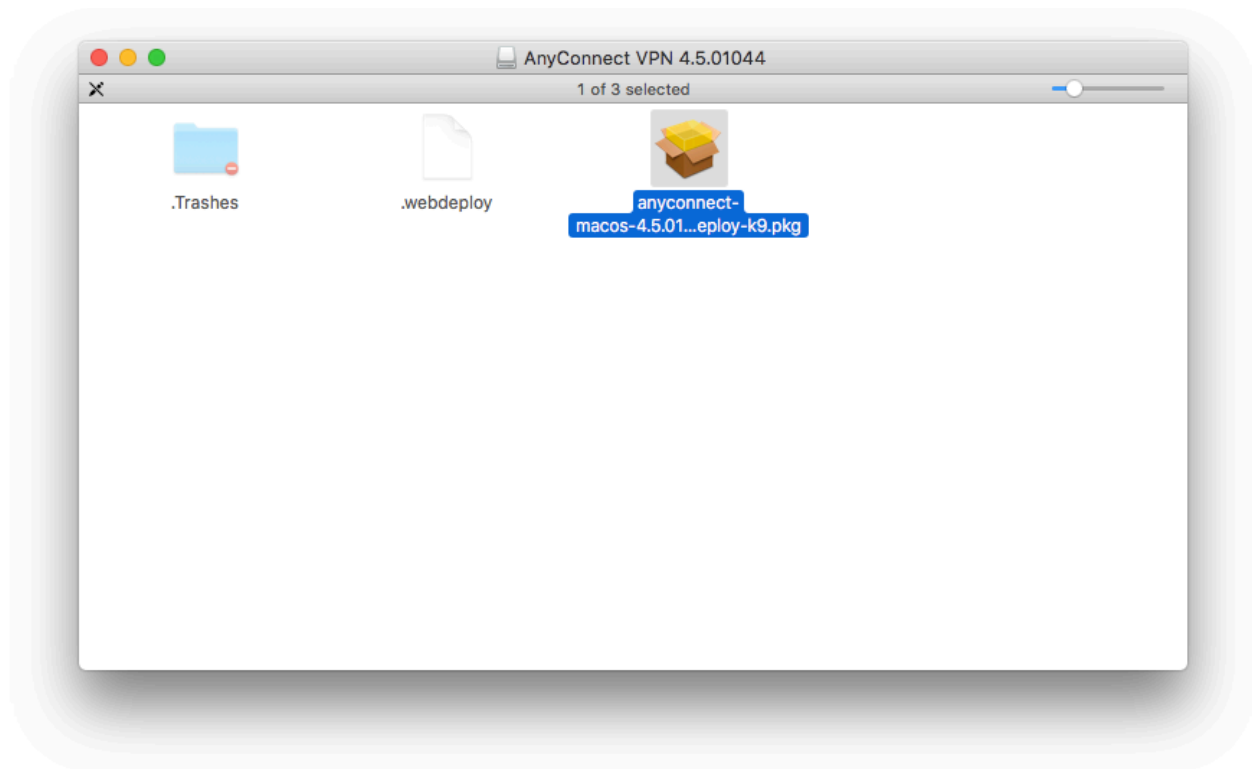

On the screen that appears after logging in, click **AnyConnect VPN**. Your computer will download the Cisco AnyConnect application.

3. Launch the Cisco AnyConnect application.

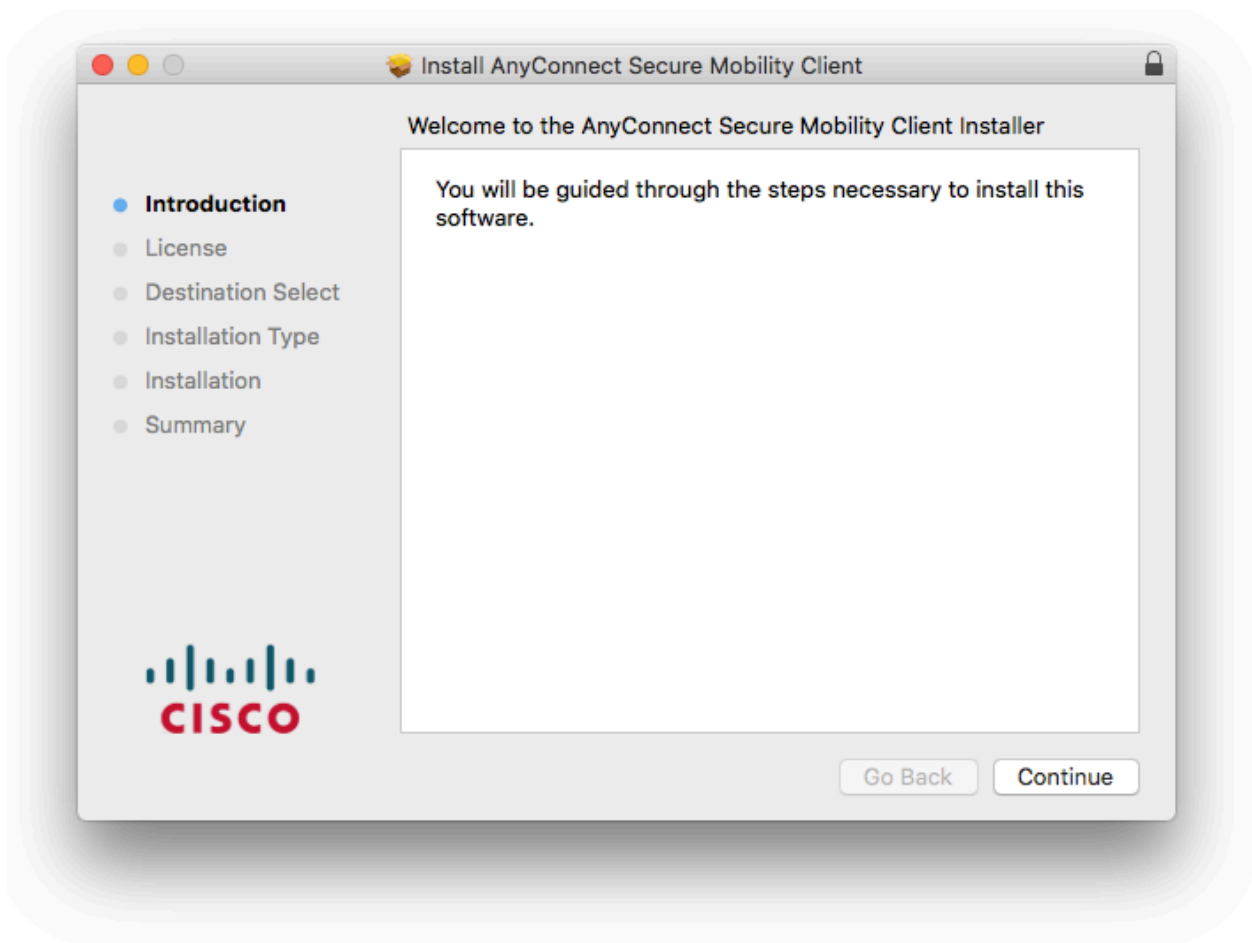

When the application finishes downloading, launch the application by clicking it's icon.

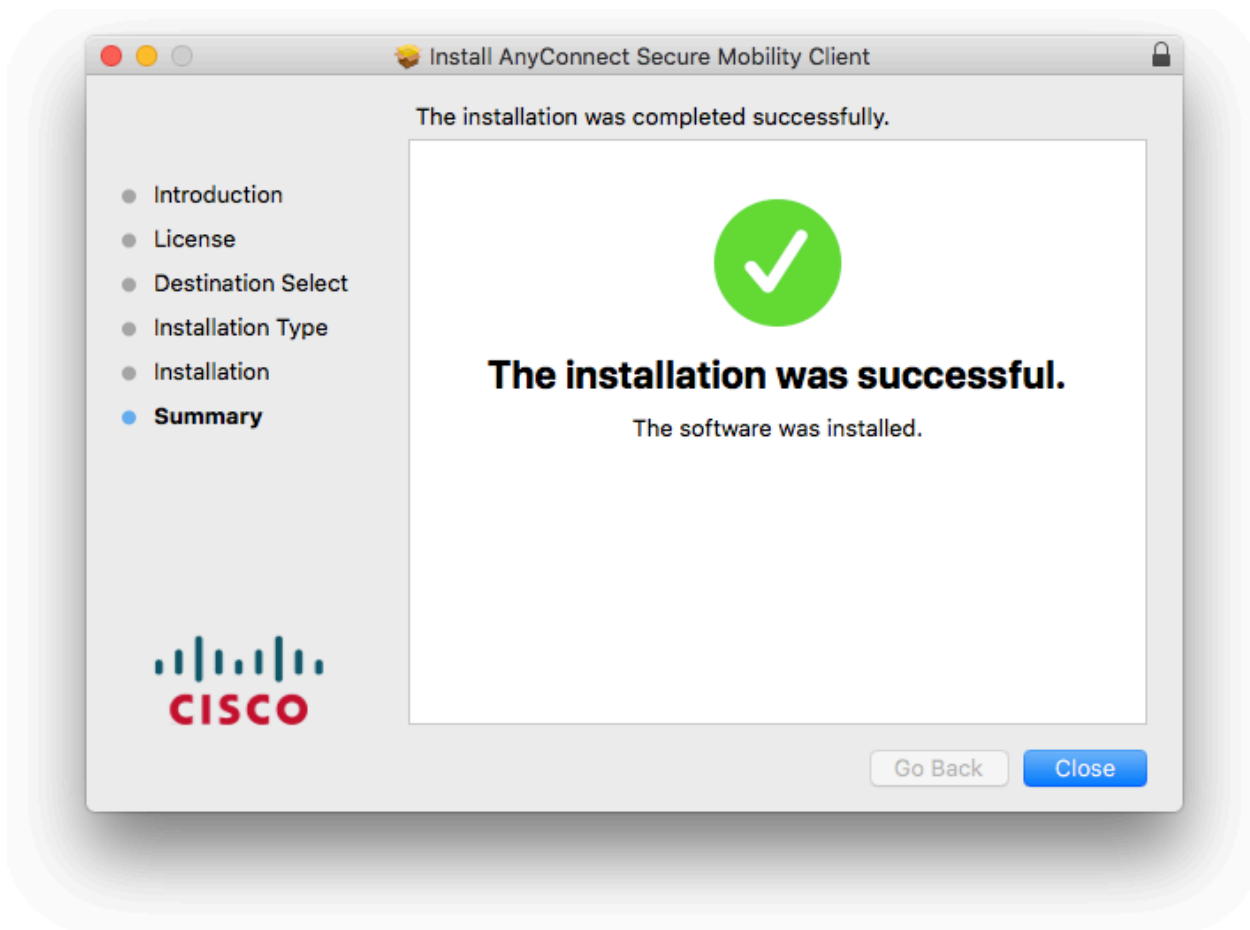

Click the icon that starts with **anyconnect-macos** to launch the installer.

4. Install Cisco AnyConnect.

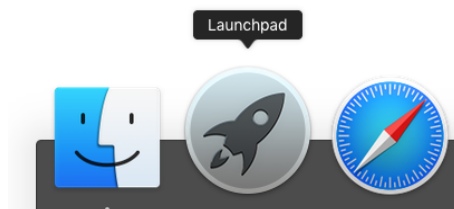

Follow the prompts to install Cisco AnyConnect. When the installation is finished, close the installer.

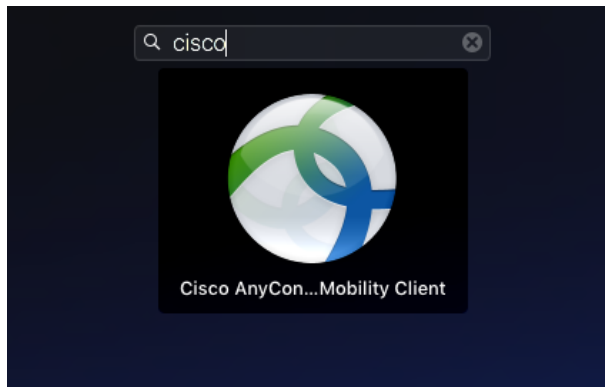

5. Launch the VPN Client to connect to the VPN.

Open **Launchpad** by clicking it's icon in the dock.

In the search box near the top, type 'cisco' to search for the Cisco AnyConnect application. Click the **Cisco AnyConnect** icon to launch the Cisco AnyConnect Mobility Client.

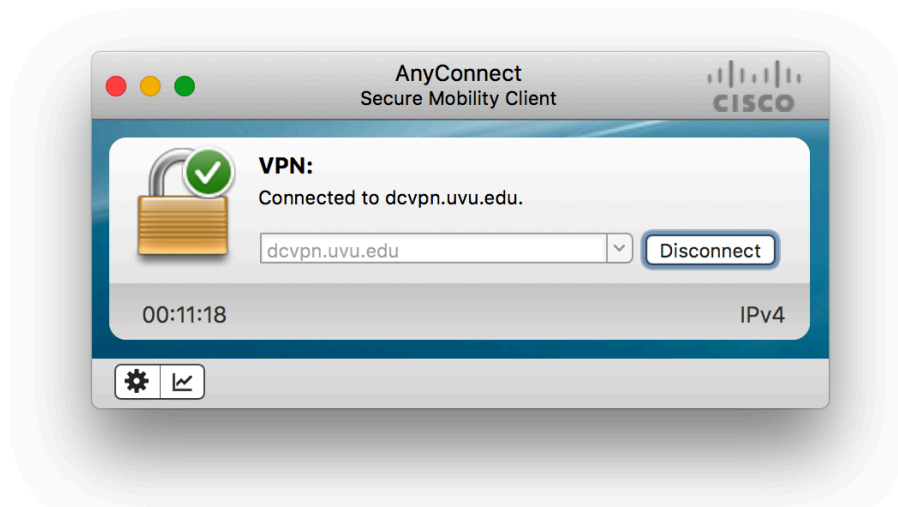

6. Connect to the Campus VPN.

Once the Cisco AnyConnect Mobility Client has been opened, enter the name of the VPN that you need to access in the field provided. It is usually **dcpvn.uvu.edu**. Click **Connect**.

Enter your UVID and password when prompted. The second password can be either **push** to send a DUO login request to your smartphone, or a 6-digit code generated by the DUO app or hardware token.

A screenshot of the Cisco AnyConnect login dialog box. The title bar reads 'Cisco AnyConnect | dcpvn.uvu.edu'. The main text says 'Please enter your username and password.' There are three input fields: 'Username:' with the value '10000000', 'Password:' with a masked password of ten dots, and 'Second Password:' with a masked password of four dots. At the bottom right, there are 'Cancel' and 'OK' buttons.

Once connected, your computer will be able to access resources not normally available when connected to the UVU campus network.

To disconnect from the VPN, click **Disconnect**.
