Manual Installation

Web-based installation was unsuccessful. If you wish to install the Cisco AnyConnect Secure Mobility Client, you may download an installer package.

Install module(s) below in the listed sequence. Platforms supported: Mac OS X 10.9 or newer

[AnyConnect VPN](#)

Alternatively, [retry](#) the automatic installation.

Help Download

3. Launch the Cisco AnyConnect application.

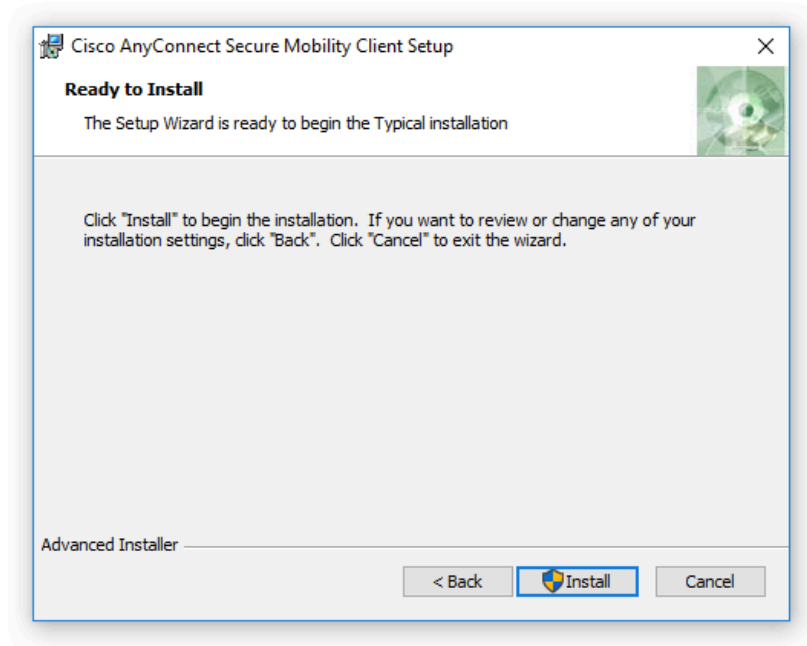

When the application finishes downloading, launch the application by clicking its icon.

Click the icon that starts with **anyconnect-win** to launch the installer.

4. Install Cisco AnyConnect.

Follow the prompts to install Cisco AnyConnect. When the installation is finished, close the installer.

5. Launch the VPN Client to connect to the VPN.

Open the **Start Menu** by clicking it's icon in the bottom left.

Near the top, you will see an icon for the Cisco AnyConnect application. Click the **Cisco AnyConnect** icon to launch the Cisco AnyConnect Mobility Client.

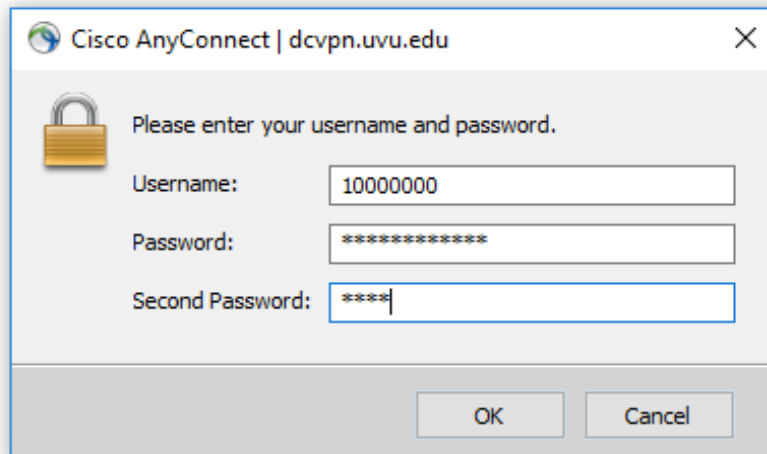

6. Connect to the DCVPN.

Once the Cisco AnyConnect Mobility Client has been opened, enter the name of the VPN that you need to access in the field provided. It is usually **dcpn.uvu.edu**. Click **Connect**.

Enter your UVID and password when prompted. The second password can be either **push** to send a DUO login request to your smartphone, or a 6-digit code generated by the DUO app or hardware token.

Once connected, your computer will be able to access resources not normally available when connected to the UVU campus network.

To disconnect from the VPN, select the Cisco AnyConnect icon in the system tray and click **Disconnect**.
