During the first night of class, students will be placed in a small group with other students and assigned a Practicum Group Mentor, who will be a licensed school counselor and leader in the field. Below are the details for the group meetings.

Students will be required to meet online once weekly with their group and mentor for 1.5 hours each time. Group meetings will be held online in a group on Teams created by the instructor. Students must come to each group meeting prepared with one case study describing a situation they experienced while working in their assigned school.

Cases should be emailed to the Group Mentor at least 24 hours before the meeting. Students will use the Case Study Template and present at least one case to his/her small group for group discussion and feedback. See the Practicum Case Studies Assignment Details for more details on this assignment.

Group Mentors will assist students in these discussions and evaluate student performance in the group setting, both as a case presenter and as a group participant. Students will submit six of their completed cases throughout the semester. Attendance and active participation in group meetings are required. Attendance will be taken on Teams. With prior approval, students may miss up to one group meeting for an extenuating circumstance and an alternative assignment will be provided. It is expected students adhere to the Virtual Meeting Etiquette.

At the end of the semester, the Group Mentor will complete a final evaluation of each group member.

Video Demonstration:

Students will be required to record one 15-minute video of themselves using one of the techniques of counseling they have learned in earlier courses to work with a client (friend/family member) and share the recording during one of the group sessions. After watching this video, each student will evaluate themselves, and the Group Mentor will also evaluate them. The Counseling Demonstration Video Assignment Details has more information on how to complete this assignment.

Practicum Documents:

At the end of the semester, students will be expected to turn in the following documents:

- Associate Educator License
- Practicum Site Supervisor Contract
- Practicum Hour Log
- Hour Log Cover Page
- Flex Hour and Conference Write-ups and Cover Pages (if completed)
- Practicum Site Supervisor Evaluation (once you have earned your 100 hours, please let Madelyn know so she can send the survey to your site supervisor)
- Group Mentor Evaluation (this will be completed by your mentor)

STUDENTS WHO DO NOT EARN 100 HOURS IN THEIR PRACTICUM OR DO NOT SUBMIT ALL OF THE REQUIRED DOCUMENTS BY THE DUE DATE WILL RECEIVE A GRADE OF FAIL FOR THIS COURSE.

Note: The site supervisor contract must be signed and submitted by the end of the second week of the semester, or the student will be withdrawn from the course.

Generative AI

AI applications should not be viewed as substitutes for your innate creativity, individuality, and analytical thinking skills. The art of writing, critical thinking, and research are disciplines that require cultivation over time to refine your unique voice. Simultaneously, it is essential to understand the appropriate utilization of AI tools and recognize the situations where AI can offer valuable assistance to your work. The use of generative AI tools (e.g. ChatGPT, Google Bard, etc.) is permitted in this course for the following activities:

- Brainstorming and refining your ideas;
- Fine-tuning your research questions;
- Checking grammar and style.

The use of generative AI tools is not permitted in this course for the following activities:

- Impersonating you in classroom contexts, such as by using the tool to compose discussion board prompts/responses assigned to you or content that you put into a Teams/Canvas chat.
- Completing group work that your group has assigned to you.
- Writing a draft of a writing assignment.
- Writing entire sentences, paragraphs, or papers to complete class assignments.

It is your responsibility to ensure that the information you provide in response to an AI query adheres to certain standards, such as not infringing upon intellectual property rights, avoiding dissemination of misinformation, and refraining from unethical content. Proper documentation and citation of your use of AI tools are necessary to comply with university guidelines regarding academic integrity.

Students utilizing AI tools for their assignments must distinctly differentiate between their original work and the AI-generated content. In these instances, the portion of the student's work generated by AI should not exceed 15%. If there are any uncertainties or confusion regarding this matter, please do not hesitate to contact me for clarification before submitting your work.

Plagiarism occurs when you:

- Use another author or source's exact wording in a way that makes it seem like your own, regardless of the original form of those words (e.g., book, article, lecture, website, speech, graphic, or any other form like an AI text generator)
- Paraphrase another author's words in a manner that closely resembles the original passage without proper citation.
- Do not clearly acknowledge the authorship of someone else when submitting work.
- Create false information that is not supported by the actual research in a writing project
- Have someone else, whether paid or not, write your paper or use a paper mill website with pre-written papers
- Produce and submit a paper created using artificial intelligence, such as ChatGPT

Using Remote Testing Software

This course uses remote testing software. Remote test-takers may choose their remote testing locations. Please note, however, that the testing software used for this may conduct a brief scan of remote test-takers' immediate surroundings, may require use of a webcam while taking an exam, may require the microphone be on while taking an exam, or may require other practices to confirm academic honesty. Test-takers therefore shall have no expectation of privacy in their test-taking location during, or immediately preceding, remote testing. If a student strongly objects to using test-taking software, the student should contact the instructor at the beginning of the semester to determine whether alternative testing arrangements are feasible. Alternatives are not guaranteed.
