Generative AI

As a part of the plagiarism policy, **using generative AI (such as ChatGPT, Grammarly AI, and other programs) to write any portion of your coursework is not allowed in this course. You may not use AI of any kind to brainstorm, write, or translate your written work for our class.** Our course outcomes require you to write English essays for yourself. **Using an AI tool to create or write work will be considered cheating, and any student doing so will receive a failing course grade.**

Many people are under the misconception that teachers can’t tell if students are using AI to write their essays, and many wrongly believe that the text can simply be modified with additions/changes or be made undetectable with the use of a bot rewriting tool; they are wrong, however. Our Canvas software includes a very sophisticated AI checker that uses submission metadata to identify the use of any artificial intelligence. It automatically checks everything you turn in and alerts me when submissions are constructed or translated (readily detectible through logarithmic patterns), you will receive an F on that assignment and risk failing the course.

On the other hand, the following non-generative AI tools and resources are allowed:

- Spell checkers
- MLA citations tools
- Writing tutors

If you have any questions about AI, please simply ask your instructor.

What is generative AI?

- Generative artificial intelligence (known as AI) such as ChatGPT or DALL-E is technology that is capable of generating text.

Can I use generative AI in this course?

- No! While some courses will teach you how to effectively use generative AI tools (and explicitly state when it is permitted), this course requires you to create your own original content

What will happen if I use generative AI in this course?

- All of your submissions will be checked with software that can detect if text was created with AI, even if it was modified afterwards and even if it was translated through a text bot. Any student that uses AI in this course will be reported to the college for academic dishonesty (which can lead to suspension or expulsion) and will fail the assignment or the course.

Using Remote Testing Software

This course does not use remote testing software.

□ This course uses remote testing software. Remote test-takers may choose their remote testing locations. Please note, however, that the testing software used for this may conduct a brief scan of remote test-takers' immediate surroundings, may require use of a webcam while taking an exam, may require the microphone be on while taking an exam, or may require other practices to confirm academic honesty. Test-takers therefore shall have no expectation of privacy in their test-taking location during, or immediately preceding, remote testing. If a student strongly objects to using test-taking software, the student should contact the instructor at the beginning of the semester to determine whether alternative testing arrangements are feasible. Alternatives are not guaranteed.

Faculty and students share the responsibility of ensuring the honesty and fairness of the intellectual environment at UVU. Students have a responsibility to promote academic integrity at the university by not participating in or facilitating others' participation in any act of academic dishonesty. As members of the academic community, students must become familiar with their [rights and responsibilities](#).
