Academic Integrity

At Utah Valley University, faculty and students operate in an atmosphere of mutual trust. Maintaining an atmosphere of academic integrity allows for a free exchange of ideas and enables all members of the community to achieve their highest potential. UVU’s goal is to foster an intellectual atmosphere that produces scholars of integrity and imaginative thought. In all academic work, the ideas and contributions of others must be appropriately acknowledged

and UVU students are expected to produce their own original academic work. Faculty and students share the responsibility of ensuring the honesty and fairness of the intellectual environment at UVU. Students have a responsibility to promote academic integrity at the university by not participating in or facilitating others' participation in an act of academic dishonesty. As members of the academic community, students must become familiar with their rights and responsibilities. In each course, they are responsible for knowing the requirements and restrictions regarding research and writing, assessments, collaborative work, the use of study aids, the appropriateness of assistance, and other issues. Likewise, faculty are responsible to clearly state expectations and model best practices. See [Student Rights & Accountability](#) for definitions and examples of what constitutes cheating, plagiarism, and fabrication. If you are ever in doubt about citing or citations, please contact me prior to submission of your written work. **Please note, that all written work in this class is run through the UVU anti-plagiarism/AI/Chatbot tool (CopyLeaks). It is expected that all work you submit for this class is your own work. If the CopyLeaks tool flags your work for cheating or any AI-use, including editing, you will automatically fail the assignment and possibly face further academic disciplinary actions.**

Using Remote Testing Software

This course does not use remote testing software.

This course uses remote testing software. Remote test-takers may choose their remote testing locations. Please note, however, that the testing software used for this may conduct a brief scan of remote test-takers' immediate surroundings, may require use of a webcam while taking an exam, may require the microphone be on while taking an exam, or may require other practices to confirm academic honesty. Test-takers therefore shall have no expectation of privacy in their test-taking location during, or immediately preceding, remote testing. If a student strongly objects to using test-taking software, the student should contact the instructor at the beginning of the semester to determine whether alternative testing arrangements are feasible. Alternatives are not guaranteed.
