

## Master Course Syllabus

For additional course information, including prerequisites, corequisites, and course fees, please refer to the Catalog: <https://catalog.uvu.edu/>

---

**Semester:** Spring

**Year:** 2025

**Course Prefix:** MAT

**Course and Section #:** 1035-X02

**Course Title:** Quantitative Reasoning with  
Integrated Algebra QL

**Credits:** 6

---

### Course Description

Teaches students to communicate, interpret, and analyze quantitative information found in the media and in everyday life to make sound personal, professional, and civic decisions. Provides the necessary algebraic content taught in context.

---

### Course Attributes

This course has the following attributes:

- General Education Requirements
- Global/Intercultural Graduation Requirements
- Writing Enriched Graduation Requirements
- Discipline Core Requirements in Program
- Elective Core Requirements in Program
- Open Elective

**Other:** *Click here to enter text.*

---

### Instructor Information

**Instructor Name:** Roxanne Brinkerhoff

---

### Student Learning Outcomes

Upon successful completion of this course, students will be able to:

1. Explain real world information presented in mathematical forms (e.g., equations, graphs, diagrams, tables, words), including making reasonable predictions of trend data.
2. Convert relevant information into various mathematical forms (e.g., equations, graphs, diagrams, tables, words) that are appropriate and accurate.
3. Perform calculations that are sufficiently comprehensive and elegant (clear, concise, etc.) to solve authentic problems.

4. Analyze real world data as the basis for competent judgments, drawing reasonable and appropriately qualified conclusions.
  5. Make and evaluate important assumptions in estimation, modeling, and data analysis using a compelling rationale for why each assumption is appropriate.
  6. Express quantitative evidence in support of an argument or specific purpose (in terms of what evidence is used and how it is formatted, presented, and contextualized).
  7. Use algebra to support objectives 1-6.
- 

## Course Materials and Texts

**REQUIRED SOFTWARE LICENSE:** In this class, it is required to have a software license for MyMathLab. The license is included with Wolverine Access. You can access it by clicking on Access Pearson of the left menu of Canvas.

**NOTES BOOKLET:** You can pick up a notes booklet at the campus store. We will be filling out this booklet as we go through the content. The booklet is also included in Wolverine Access and is REQUIRED as part of this class.

**Microsoft Office Account (Required):** We will be making extensive use of the Microsoft Office suite, especially Excel, Word, and Teams. Fortunately, as UVU students, you have access to this suite free of charge. Please visit UVU's [Microsoft Office 365 page \(Links to an external site.\)](#) to get your access. I also strongly encourage using the Desktop applications over the Online version, especially when you use Teams, as it has a better feature set.

**Webcam (Required):** You will need a simple webcam to facilitate the online proctoring system.

---

## Course Requirements

### Course Assignments, Assessments, and Grading Policy

*Click here to enter text.*

**Class time.** Students will learn by attending class and participating in the course content with the class and instructor. Points will be earned by completing in-class assignments. Often students will participate in a group project that will occur during class time. If a student misses class, or misses class often, they cannot make up the class activity.

**Projects.** Students will work with their groups on projects related to what they have learned. This is where students apply course concepts, make decisions, work with each other, and clarify questions. Some of this work will occur in class. However, groups may also need to work on their projects outside of class.

Projects can be culminating assignments that tie several topics and chapters together. Each project includes major freedom in what topics, designs, and research you perform, but provides a general structure for your work. The projects may be found in Teams, or passed out on paper by your instructor. If you miss a group project, you may make it up, but you will have to do so individually.

**Homework.** Students will practice concepts by completing the MyMathLab homework and reading the textbook. This learning should be completed regularly. Setting aside time each day to complete

homework will ultimately lead to a better mastery of the content. Late homework will be accepted until the last day of classes, for a 20% penalty.

**Quizzes (Final Exam Prep).** These quizzes are found in Canvas and are built to prepare you to be successful on the final exam. They will be completed outside of class and are meant to be formative, meaning that you will be able to review and revise your assignments. Late quizzes will not be accepted.

**End of Section Wraps.** These assignments are done in Canvas and are reflective assignments that help students to determine how their learning is going and what changes they might make to be more successful in the class.

Activity	Percent
MyMathLab Homework	10%
Projects	14%
Quizzes (Final Exam Prep)	36%
End of Section Wraps	3%
Tests (3)	12%
Final Exam	25%

---

## Required or Recommended Reading Assignments

All required readings use chapters from the course text that align with the lectures below.

---

### General Description of the Subject Matter of Each Lecture or Discussion

#### Part One Logic and Problem Solving

##### Chapter 1: Thinking Critically

- 1A: Living in a Media Age (Optional)
- 1B: Propositions and Truth Values (Optional)
- 1C: Sets and Venn Diagrams (Optional)
- 1D: Analyzing Arguments (Logical Fallacies Required)
- 1E: Critical Thinking in Everyday Life (Optional)

##### Chapter 2: Approaches to Problem Solving

- 2A: Understand, Solve, and Explain
- 2B: Extending Unit Analysis
- 2C: Problem-Solving Hints

#### Part Two Quantitative Information in Everyday Life

##### Chapter 3: Number in the Real World

- 3A: Uses and Abuses of Percentages
- 3B: Putting Numbers in Perspective
- 3C: Dealing With Uncertainty
- 3D: Index Numbers: The CPI and Beyond (Optional)
- 3E: Numerical Surprises: Polygraphs, Mammograms, and More (Optional)

##### Chapter 4: Managing Money (Required)

- 4A: Taking Control of Your Finances
- 4B: The Power of Compounding
- 4C: Savings Plans and Investments
- 4D: Loan Payments, Credit Cards, and Mortgages
- 4E: Personal Income Taxes (Optional)

4F: Understanding the Federal Budget (Optional)

### **Part Three Statistics and Probability**

Chapter 5: Statistical Reasoning

5A: Fundamentals of Statistics

5B: Should You Believe a Statistical Study?

5C: Statistical Tables and Graphs

5D: Graphs in the Media (Optional)

5E: Correlation and Causality (Optional)

Chapter 6: Putting Statistics to Work

6A: Characterizing Data

6B: Measures of Variation

6C: The Normal Distribution

6D: Statistical Inference (Optional)

Chapter 7: Living with the Odds

7A: Fundamentals of Probability

7B: Combining Probabilities

7C: The Law of Large Numbers

7D: Assessing Risk

7E: Counting and Probability

### **Part Four Modeling**

Chapter 8: Exponential Astonishment

8A: Growth: Linear versus Exponential

8B: Doubling Time and Half-Life (Optional)

8C: Real Population Growth

8D: Logarithmic Scales: Earthquakes, Sounds, and Acids

Chapter 9: Modeling Our World

9A: Functions: The Building Blocks of Mathematical Models

9B: Linear Modeling

9C: Exponential Modeling

Chapter 10: Modeling With Geometry (Optional)

10A: Fundamentals of Geometry

10B: Problem Solving with Geometry

10C: Fractal Geometry

Part Five Further Applications (Optional)

Chapter 11: Mathematics and the Arts

11A: Mathematics and Music

11B: Perspective and Symmetry

11C: Proportion and the Golden Ratio

Chapter 12: Mathematics and Politics

12A: Voting: Does the Majority Always Rule?

12B: Theory of Voting

12C: Apportionment: The House of Representatives and Beyond

12D: Dividing the Political Pie

Chapter 13: Mathematics and Business

13A: Network Analysis

13B: The Traveling Salesperson Problem

13C: Scheduling Problems

## Required Course Syllabus Statements

### Generative AI

This course requires you to complete assignments that assess your understanding and application of the material. You are expected to do your own work, and the use of artificial intelligence (AI) tools, such as chatbots, text generators, paraphrasers, summarizers, or solvers, is strictly prohibited for any part of your assignments. Using these tools will be considered academic dishonesty and will be handled according to the university's policy. If you have questions about acceptable use of AI tools, please consult the instructor before submitting your work.

---

### Using Remote Testing Software

This course does not use remote testing software.

This course uses remote testing software. Remote test-takers may choose their remote testing locations. Please note, however, that the testing software used for this may conduct a brief scan of remote test-takers' immediate surroundings, may require use of a webcam while taking an exam, may require the microphone be on while taking an exam, or may require other practices to confirm academic honesty. Test-takers therefore shall have no expectation of privacy in their test-taking location during, or immediately preceding, remote testing. If a student strongly objects to using test-taking software, the student should contact the instructor at the beginning of the semester to determine whether alternative testing arrangements are feasible. Alternatives are not guaranteed.

---

## Required University Syllabus Statements

### Accommodations/Students with Disabilities

Students needing accommodations due to a permanent or temporary disability, pregnancy or pregnancy-related conditions may contact UVU [Accessibility Services](#) at [accessibilityservices@uvu.edu](mailto:accessibilityservices@uvu.edu) or 801-863-8747.

Accessibility Services is located on the Orem Campus in BA 110.

Deaf/Hard of Hearing students requesting ASL interpreters or transcribers can contact Accessibility Services to set up accommodations. Deaf/Hard of Hearing services can be contacted at [DHHservices@uvu.edu](mailto:DHHservices@uvu.edu)

DHH is located on the Orem Campus in BA 112.

---

### Academic Integrity

At Utah Valley University, faculty and students operate in an atmosphere of mutual trust. Maintaining an atmosphere of academic integrity allows for free exchange of ideas and enables all members of the community to achieve their highest potential. Our goal is to foster an intellectual atmosphere that produces scholars of integrity and imaginative thought. In all academic work, the ideas and contributions of others must be appropriately acknowledged and UVU students are expected to produce their own original academic work.

---

Faculty and students share the responsibility of ensuring the honesty and fairness of the intellectual environment at UVU. Students have a responsibility to promote academic integrity at the university by not participating in or facilitating others' participation in any act of academic dishonesty. As members of the academic community, students must become familiar with their [rights and responsibilities](#). In each course, they are responsible for knowing the requirements and restrictions regarding research and writing, assessments, collaborative work, the use of study aids, the appropriateness of assistance, and other issues. Likewise, instructors are responsible to clearly state expectations and model best practices.

Further information on what constitutes academic dishonesty is detailed in [UVU Policy 541: Student Code of Conduct](#).

---

### **Equity and Title IX**

Utah Valley University does not discriminate on the basis of race, color, religion, national origin, sex, sexual orientation, gender identity, gender expression, age (40 and over), disability, veteran status, pregnancy, childbirth, or pregnancy-related conditions, citizenship, genetic information, or other basis protected by applicable law, including Title IX and 34 C.F.R. Part 106, in employment, treatment, admission, access to educational programs and activities, or other University benefits or services. Inquiries about nondiscrimination at UVU may be directed to the U.S. Department of Education's Office for Civil Rights or UVU's Title IX Coordinator at 801-863-7999 – [TitleIX@uvu.edu](mailto:TitleIX@uvu.edu) – 800 W University Pkwy, Orem, 84058, Suite BA 203.

---

### **Religious Accommodation**

UVU values and acknowledges the array of worldviews, faiths, and religions represented in our student body, and as such provides supportive accommodations for students. Religious belief or conscience broadly includes religious, non-religious, theistic, or non-theistic moral or ethical beliefs as well as participation in religious holidays, observances, or activities. Accommodations may include scheduling or due-date modifications or make-up assignments for missed class work.

To seek a religious accommodation, a student must provide written notice to the instructor and the Director of Accessibility Services at [accessibilityservices@uvu.edu](mailto:accessibilityservices@uvu.edu). If the accommodation relates to a scheduling conflict, the notice should include the date, time, and brief description of the difficulty posed by the conflict. Such requests should be made as soon as the student is aware of the prospective scheduling conflict.

While religious expression is welcome throughout campus, UVU also has a [specially dedicated space](#) for meditation, prayer, reflection, or other forms of religious expression.
