Generative AI

As we embrace the evolving landscape of technology in education, it is important to define clear guidelines for the use of Artificial Intelligence (AI) tools in this course. AI can be a powerful aid in your learning process, but it is crucial to use it responsibly and ethically. Below are the guidelines for AI usage in this course:

Permitted Uses of AI:

- **Brainstorming and Refining Ideas:** You may use AI for brainstorming sessions and refining your conceptual understanding of course topics.
- **Fine-Tuning Research Questions:** AI can assist in sharpening your research questions to ensure they are well-defined and focused.
- **Finding Information:** You can employ AI to gather preliminary information on your topic. However, ensure that you critically evaluate and verify this information.
- **Drafting Outlines:** AI can be used to help create initial outlines for your assignments to organize thoughts and structure your work.
- **Grammar and Style Checks:** Use AI for checking grammar and improving the stylistic aspects of your writing.

Prohibited Uses of AI:

- **Impersonation in Classroom Contexts:** Do not use AI to compose or respond to discussion board prompts, Teams/Canvas chats, or any communication that is meant to reflect your personal understanding and engagement.
- **Completing Assigned Group Work:** AI should not be used for completing tasks assigned specifically to you in group projects unless there is a mutual agreement within the group.

- Drafting Writing Assignments: You must not use AI to write drafts of your assignments. This includes generating entire sentences, paragraphs, or papers.

Responsibility and Accountability:

You are responsible for all the information you submit based on AI queries. This includes ensuring the content does not violate intellectual property laws, contain misinformation, or unethical content.

All use of AI tools must be properly documented and cited. This aligns with university policies on academic honesty.

Clearly indicate which parts of your submitted work are your own and which are generated by AI. Remember, no more than 25% of your work should be AI-generated.

Seek Clarification:

If any part of this policy is unclear or if you have doubts about the appropriateness of AI usage in a specific context, please reach out to me for clarification before submitting your work.

Adhering to these guidelines will ensure that AI serves as a beneficial tool in your educational journey while maintaining academic integrity and personal responsibility.

Using Remote Testing Software

This course does not use remote testing software.

This course uses remote testing software. Remote test-takers may choose their remote testing locations. Please note, however, that the testing software used for this may conduct a brief scan of remote test-takers' immediate surroundings, may require use of a webcam while taking an exam, may require the microphone be on while taking an exam, or may require other practices to confirm academic honesty. Test-takers therefore shall have no expectation of privacy in their test-taking location during, or immediately preceding, remote testing. If a student strongly objects to using test-taking software, the student should contact the instructor at the beginning of the semester to determine whether alternative testing arrangements are feasible. Alternatives are not guaranteed.

Academic Integrity

At Utah Valley University, faculty and students operate in an atmosphere of mutual trust. Maintaining an atmosphere of academic integrity allows for free exchange of ideas and enables all members of the community to achieve their highest potential. Our goal is to foster an intellectual atmosphere that produces scholars of integrity and imaginative thought. In all academic work, the ideas and contributions

of others must be appropriately acknowledged and UVU students are expected to produce their own original academic work.

Faculty and students share the responsibility of ensuring the honesty and fairness of the intellectual environment at UVU. Students have a responsibility to promote academic integrity at the university by not participating in or facilitating others' participation in any act of academic dishonesty. As members of the academic community, students must become familiar with their [rights and responsibilities](#). In each course, they are responsible for knowing the requirements and restrictions regarding research and writing, assessments, collaborative work, the use of study aids, the appropriateness of assistance, and other issues. Likewise, instructors are responsible to clearly state expectations and model best practices.

Further information on what constitutes academic dishonesty is detailed in [UVU Policy 541: Student Code of Conduct](#).

Religious Accommodation

UVU values and acknowledges the array of worldviews, faiths, and religions represented in our student body, and as such provides supportive accommodations for students. Religious belief or conscience broadly includes religious, non-religious, theistic, or non-theistic moral or ethical beliefs as well as participation in religious holidays, observances, or activities. Accommodations may include scheduling or due-date modifications or make-up assignments for missed class work.

To seek a religious accommodation, a student must provide written notice to the instructor and the Director of Accessibility Services at accessibilityservices@uvu.edu. If the accommodation relates to a scheduling conflict, the notice should include the date, time, and brief description of the difficulty posed by the conflict. Such requests should be made as soon as the student is aware of the prospective scheduling conflict.

While religious expression is welcome throughout campus, UVU also has a [specially dedicated space](#) for meditation, prayer, reflection, or other forms of religious expression.
