COURSE DESCRIPTION

All students are responsible for bringing their own laptop computer with BehavePlus 6.0.0 software loaded. You are responsible for double-checking your enrollment status and current address, phone number, and email address. This will help ensure that you will receive any and all information pertaining to the class in which you are enrolled. **If your supervisor has enrolled/nominated you, it's critical that you double-check your enrollment status.**

To see the updated enrollment for a class, go to uvu.edu/ufra/training/wildland/schedule.html and click on the "roll" link. These are updated weekly. If you have any questions or concerns, call Dan Cather at (801) 863-7423.

BEHAVEPLUS FIRE MODELING SYSTEM

Course Description
This is a classroom-based skills course that serves to develop basic fire behavior knowledge and skills using the BehavePlus fire behavior software program.

Objectives
- Overview of the fire modeling capabilities of BehavePlus
- Introduction to basic BehavePlus operations
- Demonstrate and discuss the fire modeling operations found in the BehavePlus program.
- Help students become proficient in the use of BehavePlus in prescribed and wildland fire operations.

Target Group
Personnel involved in developing fire behavior predictions in both prescribed and wildland fire operations

Course Prerequisites
- Basic computer skills
- Basic fire behavior and fuels knowledge

*Note: Students will receive a certificate of attendance at the completion of this course. NWCG certificates will not be handed out for this class.
