

# Norway as a Climate Conscious Light to the World

- Puts a lot of emphasis on Tourism and energy alternatives. They have certifications such as Sustainable Destinations and International Green Key. Uses mostly solar, wind and hydropower.
- Clean Energy Wire study says one of fastest states on track to net zero and even negative for the environment.
- Criticisms of most profit from oil exports but does it in a safe way.
- Annually promised at least 1% for assisting other countries, especially developing countries for SMD and environmental protections or programs.
