

UVU | MBA^o

Healthcare Management Concentration

An MBA in healthcare management provides business skills and a deeper understanding of healthcare organizations and policies, enabling informed decision-making for better patient outcomes. Students will learn to navigate complex systems, analyze policies and regulations, and develop strategic plans aligned with the following skills:

Healthcare Systems

Learn about the solutions that span care settings to meet the needs of organizations and health institutions.

Healthcare Policy

Gain valuable insight into the decisions, goals, and actions that shape how health care is accessed and administered.

Population Health

Develop management strategies and processes that improve health outcomes, care coordination, and financial models.

Full-Time MBA

1 year to finish (12 credits per semester x 3 semesters)

No work experience requirement

Trip included for international consulting course
